$$\frac{(\text{Cost} - \text{Registration Fee}) \times \text{Total hours paid not received} - \text{Equipment}}{\text{Total hours paid}} = \text{Refund}$$

Example: Assume a 650 hour program costing \$5,300.00 for tuition and \$50.00 for registration, and books and supplies of \$225.00. The student withdraws after 200 hours and takes no school equipment. The refund calculation would be as follows:

$$\frac{(\$5,300.00 - \$50.00) \times 450 \text{ Hours paid not received} - 0}{650 \text{ Total hours paid}} = \$3,622.50$$

2. For the purpose of determining a refund, the Student shall be deemed to have withdrawn from a course of instruction when any of the following occur:
  - a) The Student notifies the School of the Student's withdrawal or of the date of the Student's withdrawal, whichever is later.
  - b) The School terminates the Student's enrollment as provided in the agreement.
  - c) The Student has failed to attend classes for a one-week period. For the purpose of this paragraph, the date of the Student's withdrawal shall be deemed the last day of recorded attendance.
